Product Description

- **Wireless Wired Trans.** A USB-A to USB-C solid cable guarantees you the most stable key registrations from any precise daily work or intense gaming case. Blocks out any possible signal interference and removes the psychological concern of cordless delay.
- **Frosted Metal Cover.** The top board of the Horus keyboard is made from durable aluminum material makes the structure steady and still with slim form. The classic black frosted surface process offers an advanced minimalist look and nice fingerprint-resistant touch.
- **80% TKL Low-Profile.** Compact tenkeyless 87 keys in low-profile design, offers more space for mouse movement and shorter actuation distance. Provides precise performance at half the height while retaining white simplicity style.
- **More Extra Practical.** Set with 4*5 on-the-fly macro keys and a dedicated function area for media control. Convenient to use frequently used macros without software, play the next song, or just scroll for volume adjustment.
- **Endless Redefine Ways.** With powerful software support, whatever backlight modes, key reassignments or combo keys macro records all enable for easy access. Level up your working efficiency and gaming performance in the best way.
